

**Microwave Farm T-Probe** is coaxial probe that offers one signal pin on center and several fixed pitch ground contact with low inductance. This probe provides excellent electrical performance for applications having test point with adjacent grounds.

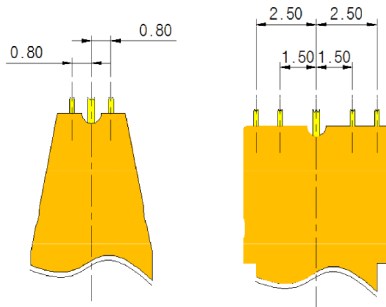

## Features

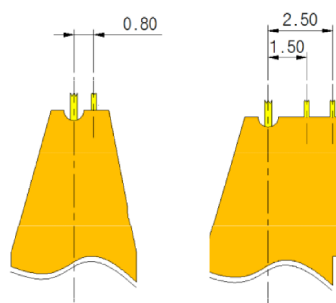

- DC to 20 GHz bandwidth
- Low insertion & Return loss (<-10 dB)
- GSG, GS configuration (0.8/1.5/2.5 mm pitch range)

### GSG Type

### GS Type

## Test Result

### GSG Type (pitch : 1.5 mm & 2.5 mm)
